THE POWER CONTAINING THE WORLD WE SHAPE THE FUTURE NOT THE PRESENT INNOVATION FOR INTERNATIONAL TRADE

Background

The purpose of the White Paper is to briefly inform readers about a complex subject and present our philosophy on it.

This context has been lost in the blockchain world, as White Papers often become marketing documents.

As co-founders of the company that built a particular implementation of the WTBDC Protocol, we present this White Paper to achieve this goal.

Throughout this White Paper, "wallet" refers to the primary user interface of blockchains.

It can include self-managed wallets where private keys are stored, as well as centralized or exchangebased wallets that act as interfaces but do not technically store the user's private keys.

WHO ARE WE?

Türkiye-based WTBDC operates as the Business Council. It aims to ensure the integration of trade between countries with its activities all over the world.

Our aim is to identify and manage international trade and investment moves.

WTBDC, in addition to our purposes, is a responsible organization that conducts international economic relations in international investments, services, contracting and logistics, researches investment opportunities abroad and contributes.

To increase international exports and to coordinate related business development activities.

With all these aspects, WTBDC has undertaken the task of revealing foreign economic relations and is a commercial diplomacy organization consisting of entrepreneurs and business representatives, its founding institutions, members and business councils.

You can visit our website for more detailed information.

https://www.wtbdc.org

MISSION

Aiming to contribute to the formation of a social order that adopts the understanding of competitive market economy, sustainable development and participatory democracy, WTBDC has set the following missions to achieve these goals:

- ✓ To give opinions to public institutions and organizations when necessary.
- ✓ Enabling companies to deepen their existing markets and reach new markets.
- ✓ Organizing national and international events.
- ✓ To produce and implement strategies and policies regarding international economic relations.
- ✓ To produce knowledge and information about the needs of the business world in international economic relations.
- ✓ To help the private sector expand its national, regional and global networks of interaction.
- ✓ To organize training programs to increase the institutional capacity of companies in line with their goals of becoming a global player.

- ✓ To carry out activities that support public diplomacy and contribute to the development of bilateral and multilateral social relations.
- ✓ Representing the Turkish business world in international and multinational organizations.
- Carrying out international lobbying activities on behalf of the country on international platforms.

WTBDC PROTOCOL

INTERNATIONAL TRADE FINANCE ECOSYSTEM MODEL TO REDUCE CARBON EMISSIONS AND ENSURE LOW CARBON EMISSIONS

wtbdc protocol is the power that covers the world, we shape the future, not the present.

TRUST

We shape the future by using blockchain technologies for a brighter future.

TRANSPARENCY

It builds trust because it represents a shared record of truth. Data that anyone can believe in helps power other emerging technologies that increase efficiency, transparency and trust.

IMPORTS

It ensures sustainability and establishing safe business processes on ethical issues.

EXPORT

It produces less bureaucracy and paperwork, operates in its own ecosystem in a secure and international transaction system.

GREEN

The parties in the supply chain become connected to each other through smart contracts between them and provide an international business model and solution that reduces the amount of carbon emissions and provides low carbon emissions.

INTERNATIONAL

International trade is changing with the effect of the wtbdc protocol. It paves the way for high-volume trade by providing a healthy infrastructure to the supply chain

TRADE ROAD

Shape safe intercontinental trade routes with all kinds of logistics facilities.

TECHNOLOGY

It uses WEB3 technologies for the development of international trade and secure international trade.

DIGITAL AGE FOR THE REAL WORLD

Concrete

Tokenization of real-world assets in the blockchain ecosystem.

Trustworhy

Reserve approved by the Canadian Gold Exchange

- 3.418.240 ounces of gold reserve
- 1.872.920 ounces of silver reserve

ARO TTI Brazil Agrobusiness – Agribusiness

• Tokenization of 3 million tons of sugar produced annually

Responsible

Global web3 ecosystem authorized to develop green bond projects

PROJECT CALENDAR

WTP GOLD TOKEN

It is a safe haven against international trade, inflation, deflation and geopolitical uncertainties.

Uncertainties and negativities in international financial markets and international trade have always led exporters to be careful and seek new alternative investment options to minimize their risks. WTP Token survives the turbulent periods of the markets with the least loss.

The economic crises experienced affect the risk preference of the exporter and the choice of securities.

WTP Token helps businesses increase their liquidity, creates a suitable financial asset for the exporter against economic crises, while the growing markets support economic growth by allocating capital where it can be most productive.

WTP Token is a highly liquid financial instrument and was developed for international trade. Like all other precious metals, it is used as a hedge against inflation, deflation and currency devaluation.

It is becoming an important part of investment portfolios for individuals, institutions and companies as well as for investors. Diversification is discussed in the literature as commodity assets suitable for hedging and safe harbor purposes.

WTBDC-ARO TTI BRASIL AGROBUSINESS TOKENIZATION

Sugar factories have been the main actors of these industrial policies since the 1920s.

WTP sugar beet and sugar production plays a role in the economic and social development of countries and provides access to sugar at affordable prices.

WTP is a priority in agricultural policies in countries.

The fact that sugar is not only an economic product but also provides many sectors with social impacts and wide employment opportunities is important in terms of the stability of sugar supply, reducing foreign dependency and ensuring food security.

In terms of its contribution to the country's economy, WTP contributes to the sugar industry's economy in many areas, together with its by-products.

ARO TTI **Brazil** factory located in **Sao Paulo, Brazil**, has been tokenized and included in the WTP Ecosystem.

WTP SUGAR

The tokenization of 3 million tons of sugar has been completed by accrediting it to the WTP Ecosystem.

WTP SUGAR

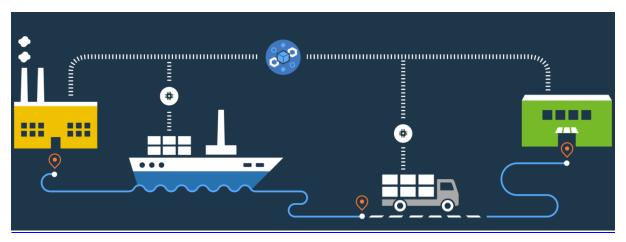

WTBDC EXPORTER – WTEX3

SHAPING FOREIGN TRADE WITH WTEX3

wtbdc exporter is the world's first blockchain ecosystem.

It aims to bring together exporters, importers, suppliers, logistics (air, land, sea), warehousing, trade routes, e-export and customers.

Establishment of finance, dealership and business partnerships in an international platform around the world

Identifying sector-independent investment opportunities by improving the foreign trade volumes of institutions

Managing the management consultancy processes of institutions and organizations in international relations

Gaining value within the system with its own token supply.

Finding international agreements around the world.

Ensuring that companies with certificates and reference approvals are safely in the system.

WTPEX – DIJITAL INVESTMENT PLATFORM

By establishing the WTPEX investment platform, it plans to provide the safest and best service to small, medium and large-sized investments and investors.

WTPEX aims to operate beyond just an exchange, as a **digital investment platform system**.

WTP GREEN – CARBON

We believe that sustainable supply chains are crucial to tackling the most severe effects of the climate crisis. Since greenhouse gas (GHG) emissions are the biggest contributors to climate change, identifying and reducing greenhouse gas emissions is also an important part of our work.

Our vision is a world without deforestation and a true circular economy where we stop producing waste and instead create circular products and reinvigorate nature, sustainable agriculture that increases biodiversity and creates healthy ecosystems, and a resilient international blockchain model that puts an end to the consumption of limited resources.

WTP GREEN BOND

Argentina, Bolivia, Brazil, Dominican Republic, Ecuador, El Salvador, Guatemala, Guyana, Colombia, Costa Rica, Cuba, Mexico, Paraguay, Peru, Chile, Uruguay and Venezuela

Globally all raw materials and markets are helping them achieve significant energy and low carbon levels while supporting their growth needs with WTBDC EXPORTER (WTEX3) to supply all markets for international trade and increase biodiversity.

We know that sustainability is the key to a better future for everyone and we use Blockchain technology to find new markets and integrate our work with technological WEB3 infrastructures.

FOR GLOBAL INTERNATIONAL TRADE (WTEX3)

RESTORATION AND CONSERVATION OF LOCAL FORESTS

CONSERVING BIODIVERSITY

SOCIAL WORK WITH LOCAL COMMUNITIES

WTP SOLAR PARK POWER PLANT-100 MW GREEN ELECTRICITY

Sustainability is aimed by integrating a renewable solar park with a production capacity of 100 MW, installation of power plants and blockchain technology.

WTP Energy solves the problems of limited viable investment instruments for the public and financing options of power plant owners.

WTP Energy is a platform to invest in low risk and high return Tokenized power plants.

The legal framework for the power plants to be securitized for investors is being developed.

Blockchain technology creates an investment tool that is transparent, reliable and easily convertible to cash for this purpose.

WTP Energy is a low-risk and profitable investment tool for individuals to meet all needs.

Power Plants are transformed into digital assets with EU compliant legal framework and blockchain technology so that they can be offered to investors from the public all over the world.

WTP encourages renewable energy production by enabling them to raise capital by trading their energy production in the form of Smart Energy Contracts.

TOKENIZE (WTP TOKEN) POWER PLANTS

EU COMPLIANCE EXCLUSIVE PUBLIC OFFERING CONTRACTS-F2

PROPERTY OF WTP TOKENIZED POWER PLANT - F4

PHASE 1: Payments on Blockchain

- Smart Contract Based Debit and Invoice Structure
- Universal WTP Token for Payments
- Integrated Payment with Bank Account and Credit / Debit Card
- Transparent Invoice and Payment

PHASE 2: Integrated Partner Network

- Extranet Platform for All Billing Companies
- Currency WTP Token for paying all bills
- Transparent Invoice and Payment System

WTP ENERGY TOKEN FOR A SUSTAINABLE FUTURE

WTP PAY – FINTECH

With the **WTP PAY** application, it expands the use of crypto money and makes financial transactions more transparent, secure and faster thanks to Blockchain technology. Through these technologies, some problems faced by traditional financial systems are resolved and new business models emerge.

WTP PAY banking service uniformizes the complex financial matrix and enables digital transformation with user-friendly components.

As a White Label (BaaS) provider empowering businesses to provide financial services to their customers, WTP PAY banking solution functions as a service, different services offered such as wallets, licensing and sublicensing, IBANs and multicurrencies, SEPA and SWIFT Transfers, Various payment modules and financial features.

WTP PAY digital wallets are becoming a common component of every modern card offering.

Adding WTP PAY digital wallets can dramatically increase consumer engagement and growth for your card program.

Features

- Customer Recognition
- Multiple Currency (IBAN)
- Multiple Gateway(CORE)
- Top Up Payment
- PEPS and Investment
- Transactions and Fraud Monitoring
- SEPA Connector
- Quick Connector
- POS and mPOS
- Custom Dashboard
- Cryptocurrency
- API(Application Programming Interface)
- Certificate

WTP PAY - PCI-DSS level 1 is the highest certification level and is reserved for service providers that process more than 6 million payment transactions per year. To achieve Level 1 certification, service providers must undergo a rigorous assessment of their security controls, policies and the highest level of security standards.

WTP ECOSYSTEM

WTP DAO

WTBDC DAO is the first mining community to operate in reality in the world by establishing the decentralized mining autonomous system.

Within the WTBDC DAO, every mine owner has equal rights and has the right to poll and vote.

WTP EXCHANGE

By establishing the WTPEX investment platform, it plans to provide the safest and best service to small, medium and large-sized investments and investors.

WTPEX is not just an exchange. It is a Digital Investment Platform System.

https://www.wtpex.com

WTP PAY

With the WTP PAY payment system, the digital assets within the ecosystem can be used for online or real shopping. Payment systems are valid all over the world with Master & Visa feature.

WTP WALLET

A wallet that is compatible with WTPEX and allows you to transfer your crypto and digital assets between wallets. WTP WALLET supports multiple blockchain infrastructures.

WTP BAZAAR

WTP Bazaar is the bidding and clearing platform within WTBDC Exporter. Portfolios can be switched by opening a WTP Gold auction within the system.

WTP META

WTP Meta contains multiple digital and parallel universes. WTP Meta aims to bridge the virtual and real world.

Land can be bought and sold according to the real (real) share value.

Shareholders can be owned in parallel houses.

Dealer networks, customers, advertisements can be created in different universe blocks.

It is possible to make profit sharing by making hotel share investments.

https://www.wtpmeta.com

WTP NFT

Wtbdc Exporter protects copyright and uniqueness by integrating digital materials uploaded by each institution and organization into the system as an NFT.

The energy projects implemented in the Wtbdc Exporter system are tracked, and the results are recorded uniquely, keeping transparency on the NFT platform.

WTP GAME FI

WTP combines Blockchain technologies and game mechanics, allowing players to earn money while playing. These technologies include NFTs, crypto WTP Token and decentralization.

WTP Blockchain also refers to the gamification of various systems to generate financial returns in the crypto industry. In GameFi projects, avatars, plots, costumes, gold, lithium and NFTs are included in games as digital asset representations.

WTP ACTUAL

Wtbdc Exporter is a blockchain-based decentralized news portal of current local and international export news.

WTP BUSINESS MODEL

WTP GOLD TOKEN

It is a safe haven against international trade, inflation, deflation and geopolitical uncertainties. Resist inflation by investing.

WTP INDUSTRY 4.0

Discover the fourth industrial revolution. By reducing energy and resource consumption, it aims to use less energy from renewable energy sources, use less space, work quickly, and double the efficiency. It connects the physical to the digital and enables enhanced collaboration and access between departments, partners, vendors, people and products. The WTP Ecosystem enables decentralized decision making. By investing in WTP Token, you are making the future of Industry 4.0.

WTP ENERGY

It is renewable, economical, sustainable, environmentally friendly and contributes to the economy. You can earn monthly or annual income with small investments.

WTP REAL ESTATE

Turning small enterprises into big profits, monthly income can be obtained from the real estate invested.

SOME OF THE INTERNATIONAL AGREEMENTS

OLD LOGOS

Note: Our project schedule may vary. New developments and different projects can be added and the white paper will always be kept up to date.
